EDUCATION

BSc Web Design & Development (Hons)

Edinburgh Napier University

Grade: First Class with Honours

2020-2024

Throughout my time at university, I gained hands-on experience in Web Design & Development by building websites from scratch using HTML, CSS, and JavaScript. These sites were developed with handwritten code, ensuring clean and functional designs. As part of my course, I worked with a live client to create a website for their upcoming business idea, which gave me a chance to understand realistic project requirements, whilst developing communication and project management skills too.

Problem solving became a key part to my development, as issues with the code appeared, which needed to be resolved efficiently. I worked with various back-end technologies such as Python, MySQL, and PHP, which broadened my skillset. Additionally, I gained experience in UX design and user-centered design, where I used Figma to create and develop user-friendly interfaces. These experiences have prepared me for work based environments, where I can utilise my skillset to work closely with web-based solutions, and provide help and support.

EMPLOYMENT HISTORY

Printing Specialist

Middlemiss Embroidery

Jedburgh, Scotland

May 2024 - September 2024

• Printing shirt sponsors onto tops for elite organisations, such as Brighton Football Club, PGA, Team GB Paralympics etc.
• Rush to create shirts to ship out, working efficiently to meet the deadline.

HOBBIES

• Playing football for my local team each week, keeping fit.

• Experimenting with different frontend and backend technologies.
